

Franz Josef C. Siblos

Email: siblosfranz22@gmail.com

Address: Auckland Central, Auckland

PROFILE:

Highly versatile IT professional and Web Developer with a strong background in back-end development and systems administration. Proven track record in designing custom business solutions for the construction and real estate industries, including payroll, inventory, and full-stack web applications. Expert in maintaining robust IT infrastructures, ensuring data security, and providing comprehensive technical support across office and field environments.

SKILLS:

- **Development:** Java, VB.NET, PHP, JavaScript, React.js, Next.js, HTML, CSS
- **Database:** MySQL, Database Administration Fundamentals
- **Systems & Infrastructure:** Computer Networking, Hardware Troubleshooting, Security Protocols, Data Backup
- **Design & Tools:** Adobe Creative Suite (Photoshop, Illustrator, Animate), Figma, MS Office Suite

EDUCATION AND CERTIFICATIONS:

Bachelor of Science in Information Technology

March 2019

Microsoft Technology Associate (Security Fundamentals)

September 28, 2018

Microsoft Technology Associate (Database Administration Fundamentals)

October 4, 2017

Microsoft Technology Associate (Networking Fundamentals)

March 15, 2017

EXPERIENCE:

IT & Systems Administrator

Toughstar Engineering Specialist Co.

October 2021 – April 2026

Bacolod City, Philippines

- **Custom Software Engineering:** Architected and continuously refined a proprietary payroll and employee tracking system designed to manage complex construction labor requirements and site-specific attendance.
- **Real-Time Inventory Control:** Designed and manages an end-to-end inventory tracking system for critical construction materials (steel, coatings, fire protection), reducing waste and ensuring zero project delays due to shortages.
- **Infrastructure Leadership:** Directs all IT operations, including the deployment and maintenance of computers, high-volume printers, and localized networks across the main office and various active project sites.
- **Network & Connectivity Resilience:** Engineered and maintains robust internet and VPN solutions to ensure field staff remain connected to centralized company resources in remote environments.

- **Cybersecurity & Data Governance:** Established rigorous automated backup schedules and security protocols to protect sensitive engineering designs, project bids, and corporate financial data.
- **Continuous Systems Improvement:** Regularly audits and upgrades hardware and software stacks to improve processing speeds and ensure compatibility with modern engineering applications.
- **Technical Problem Solving:** Provides rapid-response hardware, software, and network troubleshooting for a diverse team of office personnel and field-based engineers.

Full-Stack Web Developer
C.I.R Real Estate INC.

February 2020 – August 2021
Davao City, Philippines

- **End-to-End Application Development:** Architected and maintained a suite of full-stack PHP web applications, overseeing the entire software development life cycle (SDLC) from initial database design to front-end deployment.
- **Real-Time Streaming & Interaction:** Engineered a high-traffic real-time gaming and betting platform using PHP, successfully integrating live-stream video feeds and a secure, real-time online betting system.
- **Hospitality & Booking Systems:** Developed a comprehensive hotel reservation web application, streamlining the booking process and improving user management for hospitality clients.
- **Logistics & Delivery Ecosystem:** Designed and deployed a three-tier food delivery ecosystem, including a robust admin dashboard, a merchant-facing web interface, and a mobile-responsive application for delivery riders.
- **Data Analytics & Business Intelligence:** Built an automated reporting engine that generated daily, monthly, and annual sales reports, enabling merchants to analyze top-selling items and make data-driven business decisions.
- **Performance Monitoring:** Implemented a performance tracking module to provide monthly analytics on rider efficiency and delivery success rates, helping to optimize fleet operations.
- **Technical Design & Support:** Leveraged Adobe Creative Suite to design professional ID layouts and branding assets for various internal projects, ensuring a cohesive corporate identity.

Web Developer and Technical Support - Intern
Davao Doctors Hospital

May 2018 – August 2018
Davao City, Philippines

- **Internal Software Engineering:** Engineered and deployed a custom print-monitoring web application using PHP to track resource allocation and optimize printing workflows across hospital departments.
- **Rapid Incident Response:** Acted as the first-line troubleshooter for critical system failures, providing immediate technical resolution to ensure minimal disruption to medical staff and hospital operations.
- **Infrastructure Maintenance:** Managed hardware diagnostics and technical support for a wide range of computer equipment, ensuring high availability of essential systems in a 24/7 clinical setting.
- **Systems Optimization:** Conducted routine performance audits on computer hardware and peripherals to prevent technical bottlenecks and improve general office productivity.

PROJECT-BASED & CONTRACTUAL WORK

Solo Full-Stack Developer | Youth Wellbeing & Mental Health Tracker
March 2026

- **Full-Stack Implementation:** Architected and developed a comprehensive web-based wellbeing tracker designed to monitor and analyze mental health metrics for students.
- **Data-Driven Insights:** Engineered a secure backend to capture daily wellness inputs, providing users with visual data trends to help identify emotional patterns and stress triggers.
- **Academic Collaboration:** Partnered with student researchers to translate complex thesis requirements into a functional, user-centric application, bridging the gap between theoretical research and technical execution.
- **Privacy & Security:** Implemented secure data handling and storage protocols to ensure the confidentiality of sensitive user-reported wellness information.
- **UI/UX Design:** Crafted a minimalist, calming interface using modern tools like Tailwind CSS, React, and Vite to encourage consistent user engagement and ease of use for a younger demographic.

Front-end Web Developer & Social Media Manager March 2024 - November 2024
WorldCraft Alcohol Ventures Corporation Davao City, Philippines

- **Modern Web Architecture:** Architected and deployed high-performance, dynamic web applications for flagship brands Ben Cocky, Lim Vodka, and Loyal Bandit using React.js and Vite.
- **UX/UI Optimization:** Focused on creating engaging, user-friendly experiences designed to enhance brand recognition and drive consumer interest in a competitive market.
- **Full-Cycle Frontend Development:** Managed the entire frontend lifecycle from component design to deployment, ensuring responsive layouts across mobile and desktop devices to maximize reach.
- **Social Media Strategy & Execution:** Developed and launched a comprehensive multi-channel social media strategy, creating bespoke content and managing brand accounts to foster community growth.
- **Brand Promotion & Engagement:** Spearheaded digital campaigns for Ben Cocky, Lim Vodka, and Loyal Bandit, utilizing targeted content to increase brand loyalty and consumer engagement.
- **Cross-Functional Synergy:** Collaborated with stakeholders to align web development updates with real-time marketing goals, ensuring a cohesive digital presence across all platforms.

Freelance Junior Software Tester Oct '22 – Feb '23 & Oct'23 to Feb'24
Detail Online Technology INC. Davao City, Philippines

- **E-commerce Data Integrity:** Executed comprehensive quality assurance testing for global retail platforms, focusing on the accuracy and functionality of product landing pages and alternative URL structures.
- **URL Lifecycle Testing:** Systematically identified and resolved critical site issues, including "dead" links (404 errors) and incorrect product redirects, ensuring a seamless user journey for international customers.
- **Retailer Configuration:** Successfully configured and verified alternative product URLs for selected global retailers, maintaining database synchronization and pricing consistency across multiple digital storefronts.

- **Issue Documentation & Escalation:** Managed the formal escalation process for technical bugs, UI inconsistencies, and data discrepancies, providing clear clarifications to the engineering team to facilitate rapid fixes.
- **Cross-Departmental Collaboration:** Communicated effectively with project leads to verify that all retailer-specific requirements were met before site deployment or seasonal.
